Hi All-
I am a primary care physician who works in Williston. I see no positive medical impact of cannabis in my day to day practice and I strongly urge you to reject the cannabis bill that would allow decreased regulation. The data to support the use of cannabis for medical reasons (other than cancer pain) is non-existent. Passage of this bill would further allow cannabis to have a damaging public health impact on the people of our state, particularly younger patients who will view use of this drug as normalized.

Thank you,
Lucy Miller, MD
