What does studying at an adult school give me.

First of all, helps to adapt in the country.

Secondly, learning English helps in communicating with people, in the store, hospital, on public transport and other places. With the help of the English language I learned, I was able to get a job and get a driver's license.

And finall, thanks to my studies at scool, I receive great psychological support from my teacher and my scool frieds.
