Dear Matt,

Two years ago the BFUHS undertook the lighting reduction process with the GMP loan program. As you can see from our business manager's estimate below, the program has more than paid for itself. We have had no complaints about the lighting levels, either. I would recommend that this program be continued because it results in reduced energy usage and lower costs for schools.

Please let me know if you need more.

Hi Chris,

Based on what we have paid to date it looks like the high school will save \$35,000.00 of the 80,000.00 that was budgeted or 44%. The loan will cost \$24,000.00 leaving us a \$11,000.00 surplus. Please let me know if this doesn't make sense.

Chris,

I'm appearing before the VERmont House Education Committee tomorrow. Any chance you could send me a quick note in support of the lower light levels installed at BFUHS in 2013?

Matt
